

Pointe Mouill'ee State Game Area Master Plan

Restoration Plan Database: Crystal Reports of Individual Plan Summaries

I. BASIC PLAN DATA

Plan name:

Pointe Mouill'ee State Game Area Master Plan

Brief description of plan:

This master plan has been prepared to outline a proposal to restore the Point Mouill'ee marsh and subsequently develop and maintain the entire Pointe Mouill'ee state game area. This wetlands area is located in the SE corner of Michigan between Detroit and Toledo.

Region the plan is located within:

Great Lakes Region

Watershed(s) included within the plan:

L091x , L093x

Area plan covers (in square miles):

square miles

Plan scale:

Multi-county

Plan's lead organization(s):

Plan's Main Contact Information:

No Information Provided

On-line version of plan:

Date of original plan:

No Information Provided

II. TECHNICAL INFORMATION

Plan includes restoration goals: Y

Level of detail of the goals:

MS

Summary of the goals:

Restore 1900 acres of marsh in three separate compartments by the construction of 10,000+ linear feet of dike involving the excavation and deposition of 1,000,000 cubic yards of material.

Plan recommends restoration of specific project sites:

Y

Plan includes a discussion of funding sources:

N

Plan addresses long-term protection of restored sites:

N

Partners included in developing the plan:

Information not available

Type(s) of public outreach included during plan development:

Information not available

Plan includes public outreach as part of plan implementation (e.g. annual public meeting, local group participation):

N

Plan discusses the application of innovative approaches to restoration:

N

Plan make use of GIS mapping capabilities:

N

Plan addresses monitoring/reference sites for ecosystem level monitoring (baseline conditions) by:

N

Plan addresses monitoring/reference sites for project level monitoring by:

N

The plan discusses or coordinates with other restoration plans covering the same geographic area:

N

Other plan names:

Plan contains detailed information on historic and/or current habitat size, rate of loss, acres restored or protected, etc.):

Y

Summary of this habitat information:

Erosion of the marsh's natural barrier beach during the last 32 years has enabled storm wave energy from Lake Erie to destroy the marsh. It has been reduced to a fraction of its former size.
